

SPIRAL CONVEYORS SINGLE LANE

The APOLLO Spiral Conveyor is a proven reliable concept in vertical conveying designed to conserve valuable floorspace. It is of the chain slat type, incorporating a proprietary low friction guide system. The guide system includes precision low friction steel bearings and the chain is of heavy duty chrome plated steel construction. The guide rails are made of polyurethane embedded in an extruded aluminium profile. The slats are of moulded reinforced polycarbonate.

THE FACTS

- 50 kg/m
- 60 m/minute
- Only one motor
- Small footprint
- Low friction operation
- Built in protection

APOLLO VTS B.V. is the preferred supplier of vertical conveying solutions where quality and reliability matters. Our customers appreciate APOLLO's service minded business approach and innovative products.

FACTS & MEASUREMENTS

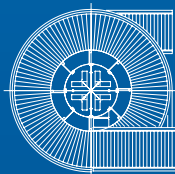

The APOLLO Spiral Conveyors are of modular design and are available in several standards versions to accommodate a wide range of loads and applications. The spirals can go up or down and can be made reversible. All models can have extended in feed or out feed, making spirals easy to fit in most lay outs.

MODELS & TYPES

Type	Dstc	D	B
1200 - 200	1200	1500	200
1200 - 300	1200	1600	300
1300 - 400	1300	1800	400
1500 - 400	1500	2000	400
1600 - 500	1600	2200	500
1600 - 600	1600	2300	600
1800 - 650	1800	2550	650

CONFIGURATIONS

Reference	Specification		
	Base Structure	Chain configuration	Side guarding
Standart Unit	Coated Aluminum pipe, with galvanised cross beams	Standard Chain	Coated in specified RAL colour
Stainless steel 1	Stainless steel pipe, with stainless steel cross beams	Standard Chain	Stainless steel
Stainless steel 2	Stainless steel pipe, with stainless steel cross beams	Standard Chain with stainless steel bearings	Stainless steel
HCR	Coated Aluminum pipe, with galvanised cross beams	Standard Chain with stainless steel bearings	Coated in specified RAL colour
