

SPIRAL CONVEYORS MULTIPLE ENTRY

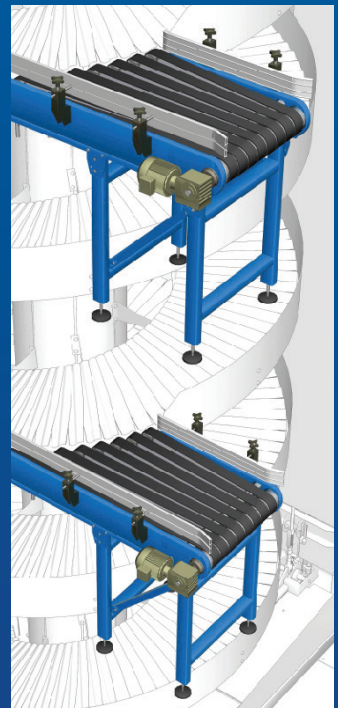

The APOLLO Multiple Entry and Outfeed Spirals. The solution for Multi-Tiered Product Flow. The multiple entry spirals allow loads to enter the spirals from several different elevations and work best when loads are fairly uniform in size and weights. A new high speed induction conveyor provides controlled spiral entry. The conveyor belts are individually adjustable to match the spiral pitch.

THE FACTS

- 50 kg/m
- 60 m/minute
- Only one motor
- Small footprint
- Low friction operation
- Built in protection
