

SPIRAL CONVEYORS

HEAVY DUTY SPIRALS

The APOLLO Heavy Duty Spiral Conveyors are in response to our customers need to go higher and handle more weight. The spirals handle double the capacity of our regular spirals and ship in one piece which drastically reduce the time and cost of installation. The load capacity is 100 Kg per meter of conveyor for speeds up to 60 m/min. The Total weight capacity in the spiral at any one time is 1.450 Kg. Only one drive motor is required, resulting in substantial savings in energy, controls and system integration.

THE FACTS

- 100 kg/m
- 60 m/minute
- Weight capacity 1.450kg
- Only one motor
- Small footprint

APOLLO VTS B.V. is the preferred supplier of vertical conveying solutions where quality and reliability matters. Our customers appreciate APOLLO's service minded business approach and innovative products.

HEAVY DUTY SPIRALS

FACTS & MEASUREMENTS

The APOLLO Spiral Conveyors are of modular design and are available in several standards versions to accommodate a wide range of loads and applications. The spirals can go up or down and can be made reversible. All models can have extended in feed or out feed, making spirals easy to fit in most lay outs.

MODELS & TYPES

Type	D	DSTC	B
1700 - 400 - HD	2.200 mm	1.700 mm	400 mm
1700 - 600 - HD	2.400 mm	1.700 mm	600 mm

CONFIGURATIONS

Reference	Specification		
	Base Structure	Chain configuration	Side guarding
Standart Unit	Coated Aluminum pipe, with galvanised cross beams	Standard Chain	Coated in specified RAL colour
Stainless steel 1	Stainless steel pipe, with stainless steel cross beams	Standard Chain	Stainless steel
Stainless steel 2	Stainless steel pipe, with stainless steel cross beams	Standard Chain with stainless steel bearings	Stainless steel
HCR	Coated Aluminum pipe, with galvanised cross beams	Standard Chain with stainless steel bearings	Coated in specified RAL colour
